The Enhanced supply chain security standards and criteria, including C-TPAT, PIP and AEO, have been recognized and implemented by the global trade community. These secure trade flows, combat illegal trafficking, and protect the security and safety of people and companies doing business around the world. As part of enforcing and adhering to the international supply chain security standards, companies must assess their supply chain to identify, mitigate and eliminate potential security risks.

Intertek’s Global Security Verification program employs a cutting-edge methodology for promoting best practices throughout the global trade industry. It enables importers and suppliers to mitigate risks associated with the cross-border transport of goods.
