MANAGEMENT SYSTEMS
AUDITING AND CERTIFICATION

TOTAL QUALITY ASSURANCE SOLUTIONS

Certification increases confidence in your company, enhancing your competitiveness in all of the world's local marketplaces.

Your market success is all in the process

It takes enormous effort to be competitive on both a national and a global basis. On one hand, you need to meet customer, regulatory, and legal requirements that are constantly evolving. On the other, you need to focus on your clients, your workplace, and the environment. To complicate matters further, you need to do it all in the face of financial turbulence, eroding bottom lines, and decreasing efficiencies.

A true partner in business improvement

At Intertek, we understand these challenges. That's why we give you more than a certificate: we give you the tools to minimize business risk, while assessing the effectiveness of your processes in achieving company goals and objectives. We act as an outsourcing partner, lending a hand with our auditing core competence by:

- Identifying cost savings and measurable improvements that support the business strategy and objectives
- Functioning as an extension of your management team
- Providing audit results that address business needs and benefit the organization

- Promoting a culture of continuous improvement
- Developing strong internal management systems

With a high level of technical expertise and an unparalleled focus on customer satisfaction, we go beyond basic compliance to be a true business partner and solution provider.
